

# Beds & Borders Container Collection™ *Petite*

*A Simple Solution to Container Gardening*

## *Illumination*

*Professionally designed for a 12-16" pot  
in full or part shade*

## *Container Gardening Tips*

**Drainage** - Always check for drainage holes before purchasing or planting a new container.

**Potting** - Fill the container 3/4 of the way with a peat-based soil. Arrange plants and fill empty spaces with remaining soil.

**Fertilizer** - If using a liquid nitrogen-based or organic-based fertilizer we recommend weekly applications. If using a control released or granular then apply monthly.

**Water** - Feel the soil, if it is dry 3 inches below the surface water thoroughly.
